

Take the AGL Efficiency Challenge

Energy Challenger is AGL's online efficiency self diagnostic tool available to all AGL Industrial and Commercial business customers.

What is Energy Challenger?

AGL Energy Challenger is a user-friendly online tool that provides businesses with an energy efficiency rating and benchmark, as well as options to improve energy management. It:

- » allows users to evaluate the effectiveness of their energy management practices and use of energy efficient technologies;
- » provides a detailed report on a business' energy efficiency rating and a benchmark comparison of it against others in the same industry;
- » provides a prioritised action plan of areas to focus on;
- » refers customers to online references on how to implement the changes;
- » gives an indication of potential energy savings that can be made through implementing the efficiency measures.

What's in it for your business?

The AGL Energy Challenger will help your business define areas of weaknesses and opportunities for energy efficiency improvement. It will also help you identify priority needs which are captured in a management action plan. Specifically, the program allows you to:

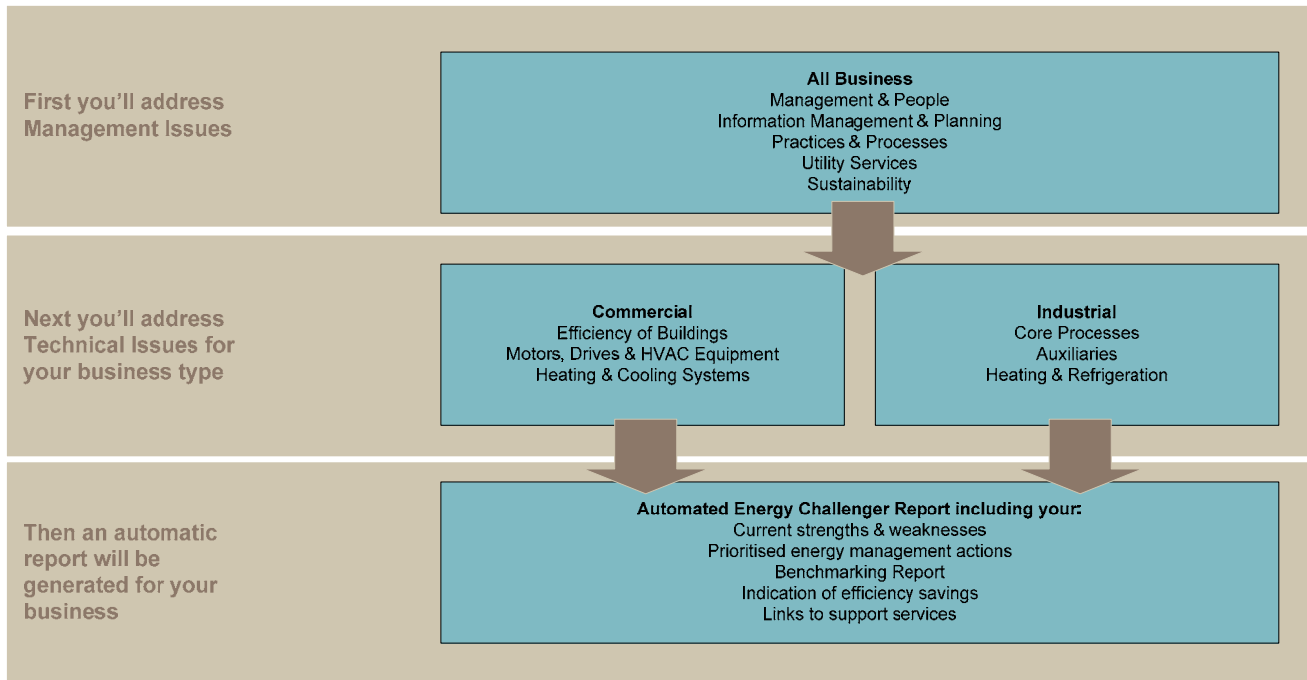

- » Better understand your business issues related to energy and carbon management;
- » Identify opportunities to reduce energy waste and associated costs;
- » Identify risks and opportunities available to your business associated with environmental concerns;
- » Diagnose your current energy management practices and estimate potential energy usage savings;
- » Develop a simple short-term action plan to address top priority items;
- » Benchmark energy management performance against other businesses in your sector and region.

How does it work?

This online assessment will take about 15 minutes to complete. The tool collects appropriate business management data and engages you through a series of technical and management questions that ascertain energy saving or efficiency opportunities.

The Energy Challenger Process

After completing the questions in all sections, AGL Energy Challenger provides you with an immediate improvement roadmap directing you to further helpful information and support services. The printable report form allows you to assign responsibilities and target dates specific to your business. You will also be provided with a benchmark against your industry and other users of the diagnostic tool.

What's the next step?

Simply contact AGL for more information on green energy or services to help you offset greenhouse emissions. Alternatively, you may e-mail us at EnergyChallenger@agl.com.au or contact your dedicated Account Manager.

About AGL

AGL is one of Australia's leading integrated energy companies. Drawing on 170 years of experience, it includes retail and merchant energy businesses, power generation assets and an upstream gas portfolio. AGL has Australia's largest retail energy and dual fuel customer base. This includes customers supplied with gas and electricity through AGL's joint venture partnership with ActewAGL. AGL has a diverse power generation portfolio including base, peaking and intermediate generation plants, spread across traditional thermal generation as well as renewable sources including hydro, wind, landfill gas and biomass. One of Australia's largest renewable energy producers, AGL is looking to further expand this position by exploring a suite of low emission and renewable energy generation development opportunities.
