

AGL Green Energy[®]

Renewable electricity for your business

Climate change is one of the world's most serious environmental problems. With the demand for energy in Australia projected to increase by 50% by 2020*, meeting this demand – while moving to a low-emissions future – is a key challenge facing Australia's future growth and living standards.

There is an alternative. AGL Green Energy is electricity generated from new renewable sources that can include wind, hydro, solar and biomass.

AGL Green Energy is accredited by the National GreenPower Accreditation Program. The GreenPower logo is your independent guarantee that AGL Green Energy comes from genuine, government approved renewable energy sources.

To purchase AGL Green Energy, participants pay a premium on all of the electricity they consume.

In turn AGL will purchase an equivalent amount of electricity from GreenPower accredited renewable sources for input into the electricity grid.

Every MWh of AGL Green Energy you purchase helps to grow the renewable energy industry.

* Securing Australia's Energy Future, Department of the Prime Minister and Cabinet 2004

CSIRO scientists predict temperature increases of 0.4 to 2 °C by 2030, and 1 to 6 °C by 2070, along with an increase in the frequency and duration of extreme weather events such as heavy rainfall, floods and droughts.

AGL Green Energy[®]

Harnessing the power of renewable electricity

When you sign up to AGL Green Energy, you will benefit in many ways:

Demonstrable environmental leadership

- Join over 900,000 residential and business customers across Australia that have chosen GreenPower products since its inception in 1997 and show that you are committed to renewable energy technologies.

Support growth in the renewable energy industry

- By purchasing a GreenPower product, you will ensure that your electricity consumption is matched with electricity fed into the grid from GreenPower accredited renewable sources. So the more people who buy GreenPower electricity, the greater the demand is for GreenPower accredited renewable energy.

Use of the GreenPower logo

- AGL Green Energy is 100% GreenPower accredited, so your business can apply to GreenPower to use their logo for promotional purposes, in accordance with the logo guidelines.
- The GreenPower logo can be used on your signage, stationery and advertising. It's a simple and effective way of showing your commitment to being green to your customers and staff.
