

AGL customers supporting Queensland's rescue helicopter

AGL is committed to making a positive impact on the lives of customers and the community in which it operates. Accordingly, AGL will assist keep Queensland's iconic rescue helicopter in the air following AGL's purchase of Energex's retail energy business.

The helicopter, operated by the not-for-profit Community Rescue has carried out more than 15,000 rescue, medical and search missions in 25 years of operation.

Previous Energex customers now with AGL can be assured that their contribution will continue and that we're committed to keeping the helicopter in the sky.

We congratulate our customers on your continued support of donating via your energy account toward a community service that helps maintain a way of life that is uniquely Queensland—the Rescue Helicopter.

It is important to note that donations made through your electricity bills will only continue while you are an AGL customer.

In the meantime if you have any questions relating to rescues, donations or helicopter operations, please contact ENERGEX Community Rescue on 1300 881 613 or visit <http://www.rescuechopper.com.au/>

AGL recognises the importance of supporting local communities and our Energy for Life program is one way in which we contribute to alleviating hardship and improving the lives of others.
