

## Save energy - save money

AGL energy-efficient products and services are designed to help you reduce energy consumption without sacrificing comfort or performance. Our aim is to work towards a cleaner environment as we help you to improve your profitability.

### Ways to save

- Use energy-efficient equipment.
- Keep appliances, equipment and fittings in good working order.
- Switch off! Leaving appliances switched on when they're not being used is the most common cause of unnecessarily high electricity bills.
- Educate your staff to use energy efficiently.
- Reduce settings of appliances and lighting levels where appropriate.
- When heating or cooling, ensure thermostats are adjusted to the manufacturer's suggested setting.
