THE COMMUNITY

Energy in
action.®

As part of our exploration for coal seam gas (CSG), AGL is drilling a core hole on AGL's Pontilands property off Tiedmans Lane. The exploration was approved by the New South Wales Department of Resources and Energy (DRE) in August 2012.

The CSG industry in New South Wales has some of the country's most stringent environmental and safety regulations that AGL is committed to meeting. We only perform activities that have all the proper approvals.

The community has been informed through a letter drop to impacted residents, community updates and website. You can also find a copy of our review of environmental factors (REF) and DRE's approval under the Environment section of the project website:

agl.com.au/Gloucester

The Gloucester Community Consultative Committee, made up of representatives from council and the local community, have also been informed.
