

AGL signs Agreed Principles of Land Access.

Agreed Principles of Land Access formalises AGL's ongoing commitment to NSW farmers.

At AGL, it's important to us to have respectful, long-term relationships with the landholders we work with. The Agreed Principles of Land Access formalises AGL's approach to respecting private agricultural landholders' wishes in relation to coal seam gas operations on their land, and the collaborative approach AGL has always taken with the landholders we work with.

AGL will continue to respect farmers who say yes or no to our operations.

The Agreed Principles of Land Access is an important step in developing NSW's natural gas resources for the benefit of the whole community.

The success of the development of coal seam gas in NSW for NSW rests on the trust we have developed with the farmers who host us on their land.

AGL is proud of our close relationships with landholders, and signing the Agreed Principles of Land Access reflects that we will continue to respect their wishes.

We're here to talk, so if you have any questions about the Gloucester Gas Project call Karyn Looby on 1300 886 170.
