AGL Energy.

Business Update.

Powering Australian Renewables Fund

- › Silverton and Coopers Gap Wind Farm Projects – progressing.
- › Broken Hill and Nyngan Solar Farms – operational.
- › QIC and Future Fund equity partners.

Generation Fleet

- › Sale of AGL's 50% interest in Diamantina Power Station JV to APA Group.
- › Deferred moth balling of Torrens Island Power Station A.

New Energy

- › Virtual Power Plant – world's largest and first battery demonstration 5MW peaking capacity.
- › Executive General Manager – Elisabeth Brinton.

Gloucester Independent Community Legacy Fund

- › Former CWA President appointed as Independent Chair and community members appointed.
- › EOIs and full applications received and assessed quarterly – ongoing.

LGBTI Inclusion Awards 2016

- › AGL Loy Yang General Manager, Steve Rieniets – regional inclusion champion of the year at Australian Workplace Equality Index (AWEI) Awards.
- › Silver tier ranking, 13th of 87 employers who participated and top six publicly listed companies.

Camden Operations.

Well Summary.

Production Well Status	Total (as at 23 March 2016)	Total (as at 10 September 2016)
Drilled (total wells)	144	144
Producing and dewatering wells	92	92
Suspended	33	32
Decommissioning and rehabilitated	19	20

Camden Operations.

Field Operations.

Production wells

12 volt air compressors installed on all operational wells to reduce fugitive emissions from instrumentation.
Leak detection and repair surveys to be completed in November 2016.

Well workovers

Completed in Spring Farm and Menangle Park during April.
Workover rig presently working in Gloucester and scheduled to return to Camden in November.

Well site rehabilitation

Early planning for final project rehabilitation.
One well (LB05) P&A completed and a further four P&A's near completion.
A further 6 wells to be P&A'd in FY17.
Good rehabilitation progress on recent P&A'd wells.

Camden Operations.

MH01 Rehabilitation – March 2016 & September 2016.

Camden Operations.

Rosalind Park Gas Plant.

Noise Monitoring

June 2016 quarterly results compliant.

Air Emissions Monitoring

All monthly and quarterly results compliant.

Compressor 1 Restart Project

5 week start up period from 25 May to 28 June 2016.

All works complied with EPL 12003 Condition E1.

Total NOx load from RPGP was 2,008kg, significantly below the 6,600kg load limit for the 5 week period.

Environmental Improvement Projects

Air compressor installation.

Produced water storage tanks.

Camden Operations.

RPGP Produced Water Storage Tanks.

Camden Operations.

Environment.

June Floods

Approximately 7,632L of produced water was released from three tanks during the flood.

The EPA has considered the impact of this volume of produced water on the flood water that was present in the catchment at the time and considers the environmental impact to be low.

AGL is working with the EPA to review AGL's flood management procedures in line with the EPA's lead regulatory role under the NSW Gas Plan.

Land & Approvals.

Business as usual.

Landholder engagement on production activities and decommissioning planning for candidate wells.

Maintaining engagement on urban development e.g. Wollondilly LEP [Station Street, Menangle] Proposal.

Community & Stakeholders.

Reviewing Stakeholder Engagement standards, policies and procedures.

Community Engagement Policy

Effective community engagement enables AGL to become a trusted and valued member of the community.

Review and update Community Engagement Policy to ensure consistency across AGL generation fleet and activities.

Engagement with business and community groups
