Introduction

Rosalind Park Gas Plant, located approximately 60km south west of Sydney, is a natural gas processing and treatment plant, used to process coal seam natural gas from the Camden Gas Project. The premises are covered by Environment Protection Licence 12003 which includes all gas wells, gas gathering, reticulation systems, trunk lines and associated effluent storage areas and work areas of the Camden Gas Project.

This Monitoring Report relates to those water monitoring activities specified in Part 5, Monitoring and Recording Conditions, of the Environment Protection Licence, specifically monitoring point 16 (Rosalind Park Gas Plant Flare Pit) (Table 1). The Licence conditions stipulate water monitoring is required to be carried out at the locations, at the frequency and using the test methods as set out in Table 2.

Table 3 presents the results of this month's water monitoring. This report is prepared in accordance with the Requirements for Publishing Pollution Monitoring Data (EPA, October, 2013) (**Publication Requirements**).

The water quality samples are analysed by an external NATA certified laboratory (ALS Environmental, Smithfield), in accordance with the EPA Approved Methods Publication "*Approved Methods for the Sampling and Analysis of Water Pollutants in New South Wales*" (EPA, 2004), with the exception of phenols and PAHs, which were analysed with an alternate method following written approval from the EPA (EPA, 2014) (refer to Table 2 for analytical methodology).

| Analyte | Units of measure | Frequency | Sampling Method | Analytical method |
|---------------------------------|--------------------------------|-----------|--------------------|---|
| BOD | milligrams per litre | Monthly | Grab sample | APHA 5210 B using APHA 4500-O G for the determination of dissolved oxygen |
| Electrical conductivity | Microsiemens per centimetre | Monthly | Grab sample | APHA (1998) section 2510 B |
| Oil and grease | milligrams per litre | Monthly | Grab sample | АРНА 5520 В |
| Phenols | micrograms per litre | Monthly | Grab sample | USEPA (1996a) method 8270 D |
| Total organic carbon | milligrams per litre | Monthly | Grab sample | APHA 5310 B |
| Total PAH's | micrograms per litre | Monthly | Grab sample | USEPA (1996a) method 8270 D |
| Total petroleum hydrocarbons | micrograms per litre | Monthly | Grab sample | USEPA (1996h) method 8015B |
| Total suspended solids | milligrams per litre | Monthly | Grab sample | APHA 2540 D |
