

Community information sessions.

You're invited.

AGL is preparing its Extracted Water Management Strategy detailing how we propose to treat produced water from the Gloucester Gas Project, and we want to hear from you.

As part of the Gloucester Gas Project we plan on constructing a desalination plant which will, using proven reverse osmosis technology, turn the slightly salty "produced" water from our gas wells into water which can be used for a variety of productive purposes.

We are holding two information sessions for the community and we want you to come along. AGL's Manager Hydrogeology, John Ross, will be on hand to explain the plan in detail and take your questions.

For more information, or to RSVP to attend one of these sessions, please contact Karyn Looby, Community Relations Manager, on 0429 040 951 or via email, klooby@agl.com.au.

Event details.

Date.

Thursday, 21 August 2014

Time.

First session: 2-4pm

Second session: 6-8pm

Where.

Gloucester Country Club
4651 Bucketts Way
Gloucester
