PREMISES	Gloucester Coal Seam Gas Project Bucketts Way Gloucester NSW 2422
LICENCE DETAILS	Environment Protection Licence 20358
LICENCEE	AGL Upstream Investments Pty Limited (AGL)
LICENCEE'S ADDRESS	Locked Bag 1837, St Leonards, NSW 2065
MONITORING DATE	7 November 2017
MONITORING BY	EMM Consulting Pty Ltd (EMM), on behalf of AGL
ANALYSIS BY	East West Enviroag, Tamworth (Work order: EW173456)
DATE AGL OBTAINED DATA	12 December 2017
REPORT DATE	12 December 2017 Revision B (Addendum): 7 September 2018
REPORT PREPARED BY	James Duggleby, Principal Hydrogeologist, EMM, on behalf of AGL

Introduction

On 4 February 2016 AGL Upstream Investments Pty Ltd (AGL) announced that the GGP will not proceed to final investment stage. AGL will relinquish Petroleum Exploration Licence (PEL) 285 to the NSW Government and are completing a comprehensive decommissioning and rehabilitation program for well sites and other infrastructure in the Gloucester region.

This Monitoring Report relates to the monitoring activities specified in Part 5, Monitoring and Recording Conditions, of the Environment Protection Licence 20358. This report relates specifically to the monitoring surrounding the Tiedman Irrigation Program, and details monitoring results from a soil sampling event at the Stage 1B area of the Tiedman Irrigation Program (7 November 2017). The soil sampling was event is in compliance with Conditions M2.2 and M2.6 of EPL 20358 which requires soil sampling of the Stage 1B area at the conclusion of the irrigation program. The irrigation program was completed in October 2017.

As per EPL 20358, the monitoring encompasses the monitoring points at the locations as shown in Table 1 and Figure 1. The specific analytes and frequency tested are shown in Table 2. The monitoring results for this reporting period are shown in Table 3.

The monitoring points that are the subject of this report were part of the GGP soil monitoring network, as described in AGL's Soil Quality Monitoring and Management Program (FK, 2012). Soil monitoring results for the irrigation program are presented in a baseline water monitoring report (FK, 2013a) and six-monthly compliance reports (FK, 2013b, 2014a and 2014b; and Jacobs, 2015a, and 2015b) up to May 2015.

Samples were taken manually using a hand auger at 20 cm intervals until 120 cm depth, or until first refusal on rock.

The soil samples were analysed by East West Enviroag Pty Ltd, Tamworth, NSW, a National Association of Testing Authorities (NATA) and the Australasian Soil and Plant Analysis Council (ASPAC) accredited laboratory.

This report is prepared in accordance with the Requirements for Publishing Pollution Monitoring Data (EPA, 2012) (Publication Requirements).

The remaining water and land monitoring points in EPL 20358 will be reported in subsequent reports when the requirement for monitoring is triggered.

More information on the groundwater monitoring of the GGP is available on the project website:
agl.com.au/Gloucester

EPA ID no.	Monitoring Point	Type of monitoring point	Easting (m)	Northing (m)
100	CS17	Soil quality monitoring	402226.4	6448943.4
101	CS18	Soil quality monitoring	402202.8	6448877.5
102	CS19	Soil quality monitoring	402317.4	6448868.3
103	CS21	Soil quality monitoring	402390.9	6448791.5
104	CS22	Soil quality monitoring	402176.6	6448732.1
105	CS23	Soil quality monitoring	402190.3	6448810.1
106	CS24	Soil quality monitoring	402297.1	6448738.4
107	CS25	Soil quality monitoring	402379.8	6448753
108	CS26	Soil quality monitoring	402341.7	6448689.7
109	CS27	Soil quality monitoring	402510.5	6448662
110	CS28	Soil quality monitoring	402443.7	6448603.1
111	CS29	Soil quality monitoring	402481.8	6448564.1
113	CS20	Soil quality monitoring	402413.1	6448904.5

Coordinate reference system: Map Grid of Australia 1994

Table 1: Soil quality monitoring points: Irrigation Program (as per EPL 20358)

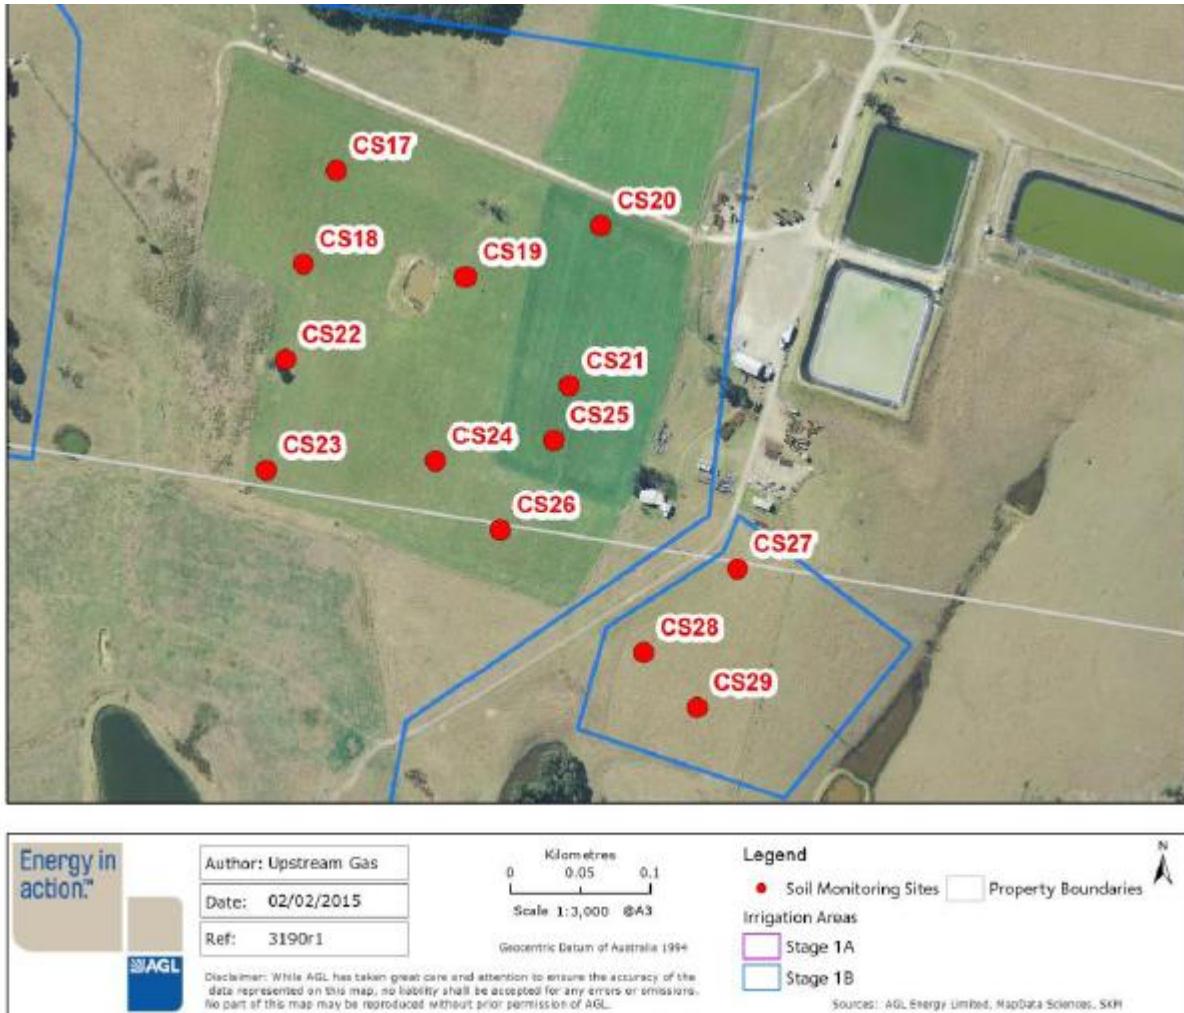

Figure 1: Location of groundwater and surface water quality monitoring points (as per EPL 20358)

Analyte	Units of measure	Monitoring points	
		100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 113	
		Frequency	Sampling method
Aluminium	milligrams per kilogram	Special Frequency 5	Grab sample
Available phosphorus	milligrams per kilogram	Special Frequency 5	Grab sample
Boron	milligrams per kilogram	Special Frequency 5	Grab sample
Calcium	milligrams per kilogram	Special Frequency 5	Grab sample
Chloride	milligrams per kilogram	Special Frequency 5	Grab sample
Electrical conductivity	microsiemens per centimetre	Special Frequency 5	Grab sample
Exchangeable sodium percentage	percent	Special Frequency 5	Grab sample
Iron	milligrams per kilogram	Special Frequency 5	Grab sample
Magnesium	milligrams per kilogram	Special Frequency 5	Grab sample
Manganese	milligrams per kilogram	Special Frequency 5	Grab sample
Nitrogen (nitrate)	milligrams per kilogram	Special Frequency 5	Grab sample
Organic carbon	milligrams per kilogram	Special Frequency 5	Grab sample
pH	pH	Special Frequency 5	Grab sample
Phosphorus	milligrams per kilogram	Special Frequency 5	Grab sample
Potassium	milligrams per kilogram	Special Frequency 5	Grab sample
Sodium	milligrams per kilogram	Special Frequency 5	Grab sample
Sulfate	milligrams per kilogram	Special Frequency 5	Grab sample
Zinc	milligrams per kilogram	Special Frequency 5	Grab sample

Notes:

Special Frequency 5 = At the conclusion of the irrigation program samples will be collected at 20 cm intervals until 120 cm, or until refusal on rock.

Table 2: Analytes monitored and frequency - soil monitoring points 100 - 111 and 113, as per EPL 20358 (version 5 January 2017)
