

Silverton Wind Farm - Environmental Performance Reporting

GE & AGL provide regular reporting on the environmental performance of the Silverton Wind Farm project on the AGL website in accordance with the reporting arrangements in any plans or programs approved under the conditions of this approval.

This document provides a summary of the environmental monitoring and performance of the Project for the month of **June 2020**.

General Environmental Management Performance

Environmental Aspects	Status
Pollution complaints	No pollution complaints.
Soil, water, sediment, erosion	No soil or water pollution incidents that cause material harm to the environment.
Birds and Bats	Monthly monitoring of bird and bat strikes has been conducted. Trigger levels not exceeded. 1 x Incidental Find, Location WTG01, White-striped free-tail Bat
Biodiversity	Ongoing actions as per the Operational Biodiversity Adaptive Management Plan, Porcupine Grass Sparse Woodland Recovery Plan, Barrier Range Dragon Management Plan, Goat Management Plan, Vegetation Management Plan No recorded impacts to: Porcupine Grass Sparse Woodland; Mulga/Red Mallee Shrubland; Barrier Range Dragon habitat.
Heritage	Ongoing actions as per the Heritage Management Plan. No recorded disturbance to heritage items.
Fire / Bushfire	No bushfires triggered from wind farm operations
Waste	Waste volumes recorded and appropriately disposed.
Rehabilitation	Seed collected and waiting for adequate rainfall.
Community	The Community Consultative Committee was held in June (remotely) and at the Municipality Chambers in Silverton. The Silverton Community Fund was allocated to two local organisations, the Silverton Village Committee and the Silverton Goal Museum. No major issues were raised except AGL was asked to check on the performance of the new Telstra Small Cell tower as some residents are reporting bad mobile reception.
Biodiversity reports	Ongoing environmental reporting completed in accordance with management plans and Environmental Management Strategy. Annual Vegetation Monitoring Reports Submitted to DPIE in June 2020.
Other updates	Awaiting information from the Australian Museum in regards to the unidentified carcass found onsite. Noise monitoring loggers were installed in June and are currently being monitored to meet operational noise compliance requirements.
