

Greenhouse Gas Emissions Standard

AGL-HSE-STD-009.9

This standard applies to AGL controlled operations that are required to provide GHG emissions and energy data/information to the AGL Economic Policy and Sustainability team, under the requirements of the AGL Energy and GHG Manual.

The reference numbers given to minimum controls provide a direct linkage between this standard and the Risk and Control Matrix. The Greenhouse Gas Emissions Methodology AGL-HSE-SDM-009.9 provides further explanation of how to achieve the minimum controls.

RCM Ref	Minimum Controls
GREENHOUSE GAS EMISSIONS AND ENERGY REPORTING	
9.9.1.1	AGL controlled operations must collate specific GHG emissions and energy data, and other energy related information, in accordance with the reporting requirements prescribed by the AGL Economic Policy and Sustainability team.
9.9.1.2	Whenever required, relevant AGL controlled operations leaders and/or technical experts must support the AGL Economic Policy and Sustainability team in: <ul style="list-style-type: none"> • Clarifying site level GHG emissions and/or energy data or energy related information; • Assisting in the development of site specific GHG emissions and energy reporting procedures; and • Assisting with regulatory audits and other adhoc GHG emissions and energy data/information queries.
