Low-season Demand	From 2 pm to 8 pm on working weekdays during 1 April to 31 May and 1 September to 31 October (inclusive) – the non-summer and non-winter months.	c/kw/day	0.00	0.000
Supply charge		c/day	119.00	130.900
*Tariff closed to premises not already taking supply under this tariff and new connections				

AGL Reference Price Comparison

What does this mean for the average customer? Following the introduction of price regulation, electricity retailers are now required to tell residential and small business customers about how their electricity rates would compare to the benchmark “Reference Price” set by the AER for an average customer. An average residential or small business customer is someone in a particular distribution area (e.g. Ausgrid Networks), on a particular type of tariff (e.g. single rate), who uses the average annual household / small business consumption determined by the AER. Where an energy plan includes different components (i.e. Controlled Load and time of use), the AER has also specified how the average annual usage should be split between these components. Keep in mind that the figures in this section are estimates only and based on the usage patterns of an “average customer”. Your electricity costs may be significantly different depending on your own actual usage.

Tariff	Average Annual household usage	Estimated annual cost (incl. GST)	Comparison to Reference Price
Residential Single Rate	3900 kWh	\$1,808	8% less than
Residential Single Rate with Controlled Load 1	6800 kWh	\$2,454	9% less than
Residential Single Rate with Controlled Load 2	6800 kWh	\$2,454	9% less than
Residential Single Rate with Controlled Load 1 & 2	6800 kWh	\$2,454	9% less than
Residential Seasonal Time-of-Use	3900 kWh	\$1,806	8% less than
Residential Seasonal Time-of-Use with Controlled Load 1	6800 kWh	\$2,447	9% less than
Residential Seasonal Time-of-Use with Controlled Load 2	6800 kWh	\$2,447	9% less than
Residential Seasonal Time-of-Use with Controlled Load 1 & 2	6800 kWh	\$2,447	9% less than
