

AC-Coupled SIS Australia

Renewable Made Reliable

Sunverge Energy's AC-coupled Solar Integration System (SIS) offers a range of battery capacity options and works with existing or new solar photovoltaic (PV) installations. Designed for indoor and outdoor environments alike, the UL-certified appliance combines battery storage and complete power electronics in a single unit controlled by Sunverge's advanced cloud-based software platform. Offering the industry's best back-up power, this system enables homeowners to power more appliances and in different combinations than is possible with competing solutions. The Sunverge SIS, unlike traditional AC-coupled systems, provides dedicated connections for PV and critical load panels inside the system, which results in less external wiring and faster installation. In addition, the Sunverge SIS allows control of the external PV system, a vital feature in markets with grid export limits.

AC Input/Output	SIS-7048
	50 Hz
Continuous Output Power	5,000 W
Surge Rating (10 seconds)	5,000 W
AC Input Voltage	230 VAC Single Phase
Recommended AC Breaker	40 A Type B RCCB
Output Wave Form	True Sine Wave
Total Harmonic Distortion	<5% at rated power
Automatic Transfer Relay Rating / Typical Transfer Time from Grid to Back-Up	60 A / 8 milliseconds
Inverter Peak Efficiency	95.7%
Inverter CEC Weighted Efficiency	93.0%
Depth of Discharge	85%
