Comparison Price set by the AER

**What does this mean for the average customer?** Electricity retailers are required to tell residential and small business customers about how their electricity rates would compare to the benchmark "Comparison Price" set by the AER for an average customer. An average residential or small business customer is someone in a particular distribution area (e.g. SA Power Networks), on a particular type of tariff (e.g. single rate), who uses the average annual household / small business consumption determined by the AER. Where an energy plan includes different components (i.e. controlled load and time of use), the AER has also specified how the average annual usage should be split between these components. For some "regulated" tariffs, the AER has set tariff caps, which are maximum amounts for each component of the tariff. Keep in mind that the figures in this section are estimates only and based on the usage patterns of an "average customer". Your electricity costs may be significantly different depending on your own actual usage.

Pricing information for electricity in South Asustralia effective from 1 July 2026.

| Tariff                                                                      | Average Annual household usage | Comparison price set by the AER (incl. GST) | Difference from Comparison Price |
|-----------------------------------------------------------------------------|--------------------------------|---------------------------------------------|----------------------------------|
| Regulated                                                                   |                                |                                             |                                  |
| Residential Single Rate                                                     | 4000 kWh                       | \$2,334                                     | Equivalent to                    |
