

AGL's Farmers and Business Assist

Solar Assistance for farmers and rural small businesses.

We understand it has been tough for rural communities and businesses with ongoing unpredictable weather and events. That's why we have extended our program to support rural small businesses across a variety of sectors operating in recent or current drought affected regions.

With Solar Assistance, you'll receive an upfront discount of between \$2,500 and \$25,000 (excl GST) on the cost of an AGL supplied and installed solar panel system, depending on its size. Once your system is up and running, the solar energy it generates won't cost you anything, however associated costs like maintenance will still apply.

Please note, this assistance package is available to 30 June 2021, unless extended or fully subscribed.

Benefits

Here's how Solar Assistance may help make managing your energy costs easier in the long run.

 Installation of a new solar panel system with an upfront discount of between **\$2,500 and \$25,000** (excl GST).^{1,2}

 No active AGL gas or electricity account required.

 Can be combined with **Drought Relief Assistance**.³

Eligibility

- For farmers and rural small businesses**
You're registered with the ATO and have an Australian Business Number (ABN).
- In an eligible area**
You are in an AGL serviceable area and are in or have recently been based in a drought affected region of NSW, QLD, VIC, SA or WA.^{4,5}
- Small Business Entity**⁶
You're running a business with less than \$10 million aggregated turnover.
- Registered for GST**
Your business is registered for GST with the Australian Government's Business Registration Service.

Solar Assistance is intended for customers who are able to purchase the subsidised solar system upfront. You should make your own enquiries and seek independent legal advice as to whether Solar Assistance is appropriate for you and your financial circumstances. A site inspection is required to determine site suitability, and we will discuss with you what size system is appropriate for your circumstances. You may be required, at your cost, to ensure that your premises are suitable for the solar system.

Funding still available. Apply online now.

Progress for life

1 AGL's Solar Assistance initiative offers a discount to the system price of \$250 (excl GST) for each 1kW installed. The minimum system size eligible for the discount is 10kW. The maximum system size eligible for the discount is 100kW. System sizing is subject to engineering design. Subject to the solar sale standard AGL terms and conditions which are available upon request. 2 For outright purchases, the Upfront Solar Discount is a once off payment applied to the system price on a lump sum basis before taxes. 3 Depending on eligibility. Please visit agl.com.au/ruralassist for more details on the Drought Relief Assistance eligibility criteria. 4 Eligibility is determined at AGL's discretion. 5 One application per customer. 6 As per the ATO definition of 'Small Business Entity': You are a small business entity if you are carrying on a business with less than \$10 million aggregated turnover. When we say 'you' we mean the individual, partnership, company or trust that runs the business. For full Terms and Conditions and Eligibility Criteria please visit agl.com.au/ruralassist.
